

HR EXCELLENCE IN RESEARCH

HRS4R Working Group meeting

18.05.2021

- During the meeting the state of implementation of the activities included in the HR Strategy for the Jagiellonian University Researchers was presented. The HRS4R Working Group discussed also the conclusions and recommendations resulting from the periodic evaluation of the activities realised so far, which was carried out by EC experts in August 2020.
- In the course of the discussion it was agreed that one of the Group's priorities will be to update the principles of the researcher recruitment policy, including the development of proposals for provisions that define the rules of appointment and composition of selection boards, as well as the definition of the framework for the appeal procedure in line with the OTM-R guidelines.
- It was agreed that the Action Plan 2020-2023, adopted for implementation and currently in force, needs to be analysed in terms of comments submitted by the experts and extended to include new tasks closely related to both the new Jagiellonian University 2030 Strategy (currently being developed) and the Excellence Initiative – Research University Programme.
